JUN 2 1971

Mr. Benno Schmidt
New York

Dear Mr. Schmidt:

I am sorry I have not been able to remain in closer touch with the development of the new Cancer programs, to which you have given so much effort, and with such constructive results. Having gone so far, we may now find that we differ on the formulation of the best ways to carry the opportunity further; but I realize that this problem exists only as a testimonial to the remarkable advances so far.

In response to an urgent request from Senator Nelson's office, I drafted the enclosed letter which summarizes my views at the present time.

I hope that Mr. Quinn had forwarded some of my previous statements, as I had asked him to do.

Yours sincerely,

ENC
